

XENIAL DRIVE-THRU

Turn Your Drive-thru into a Fly-thru

Have your drive-thru operations hit a pothole? When bumper-to-bumper is the norm, average service times spike upward and customers drive away. Turn drive-thru into fly-thru with Xenial Drive-thru technologies.

Xenial drive-thru digital menu boards make your menu items marquee-worthy. Video and moving graphics highlight specials, featured LTOs, and combos. Order confirmation boards keep orders accurate and promote add on items with every order. Xenial ordering quickly and accurately takes all the orders and moves them, real-time, into the kitchen. Did someone in the car decide to add one more item when they pulled up to pay? No problem, Xenial Ordering and Xenial Kitchen Management allow you to change the order on the spot and prioritize the change so drivers don't wait.

Is your menu focused on items with complex modifiers like sandwiches and burritos? Simple, quick self-order and pay in the drive-thru lane is just a few touches away with Xenial Drive-thru kiosk.

Xenial Drive-thru Director uses sensors in the lanes and on the order boards to track and display cars on the drive-thru monitor in real time even dual lanes. And how do you get staff to speed up service? Xenial Drive-thru Director adds competition between your store locations using gamification techniques.

Pull your "pit crew" together and drive more business with Xenial.
