

XENIAL ORDERING

# Feast on "Crunch Time" Profits

The breakfast rush, the lunch surge, the after work crowd – crunch time means revenue time for QSR and fast casual restaurants. The bad news – it can also mean long lines, annoyed customers and slow service. Don't fall into the point-of-sale crunch time trap. Xenial Ordering keeps orders flowing and customers smiling while reducing costs.

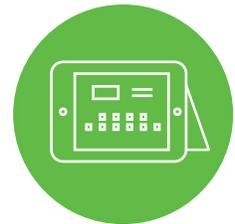

Omni-channel? Way more! Try alpha-omega-any-way-a-customer-wants-to-order-channel.

Kiosk, counter, drive-thru, customer app, website, voice and even third-party delivery. Everything flows through the Xenial Restaurant Cloud. This kitchen-centric, feed-the-customer solution provides state-of-the-art, cloud-driven, smartphone-easy apps running on all sorts of devices.

Bust a line with a fully mobile tablet? Sure. Self-order at a sit-down table or a standalone kiosk? Of course. Self-serve kiosk in a drive-thru? Yes, even that.

Ordering has never been more connected thanks to the Xenial Cloud. Built on Amazon Web Services, Xenial Ordering throws the POS server out of the store. This takes security, infrastructure, redundancy, data and scaling issues "off your plate".

Are you not fully ready to move everything over to the cloud? That's fine, the Xenial Cloud plays nice with existing technologies too. So you can start innovating where you need it the most and bridge your business reality to where you need to go. We call that future-proofing your restaurant.
